Istanbul is not only the pearl of Turkey but also of the whole world... It has been the subject of poems, songs, pictures and inspired lovers with its unique beauty... It is a city for which many nations fought and spilled blood and it is also a city that disappointed many self-dedicated commanders that tried to conquer it in the history...

Istanbul is the only city that was founded on two continents where Asian and European Continents are separated from each other by a narrow strait called 'Bosphorus'. Istanbul has managed to captivate many world-renowned actors and actresses with its magnificent landscape. This is a city that tirelessly hosts thousands of tourists every year thanks to seagulls, sea, ferry, Golden Horn, Eyüp Sultan, Emirgan, Prince's Islands and many other beauties.

"Istanbul is a city located at the junction of two big worlds as the jewelry of the Turkish land, fortune of the Turkish history and pupil of the Turkish nation, in the heart of all citizens."
OUR MISSION
Based on high technology knowledge and 115 years of traditional, deep-rooted, scientific and social memory;
- Our mission is to maintain our identity of being a Training & Research Hospital,
- That provides contemporary, standardized and measurable specialization training,
- Ensures common satisfaction of patients and employees,
- Provides diagnosis and treatment services at the highest standards through our reference hospital policy,
- Provides training to qualified specialized doctors and medical staff, and has smiling-face service concept in health sector.

OUR VISION
To become an international, exemplary organization that adopted the fundamental principle of contemporary service and training concept, and that made a difference with the concept of
- Planning
- Implementing
- Checking
- Measuring and Assessing its Activities,
integrated with its employees as a family, and maximized the satisfaction of its patients and employees through its scientific and qualitative service concept and performance.

OUR STRATEGIC TARGETS
- To improve the quality of training, education and patient care,
- To develop research capacities and opportunities and to encourage all our staff to do researches,
- To develop appropriate management systems that will ensure effective and efficient activities,
- To establish and implement efficient internal and external policies,
- To establish, manage and maintain cooperation with universities, public and private sector,
- To enhance service quality and diversities of our hospital in health services,
- To improve physical and technology infrastructure for the purpose of increasing training and education quality of our hospital,
- To reduce energy costs of our hospital and to create renewable energy sources for the purpose of increasing environmental awareness,
- To manage and maintain projects such as "Baby-Friendly Hospital", "Mother-Friendly Hospital", 'Handicapped-Friendly Hospital', 'Baby-Friendly Neonatal Intensive Care Units' for our patients at our hospital and "No-Smoking Hospital" for our employees,
- To provide platforms where our patients and employees can comfortably express their thoughts and suggestions in our hospital.
- To achieve Group A success rate in all areas of 'Efficiency Record" in line with our targets.

ACCOMMODATION
OUR TEAM
Here is a huge, warm house and we are a very big family. With the young people coming from other countries and other cities... We are your second family with an energetic team that works to make life easy for you... What we want is to be with you during this tough process when you are away from your family. While you try to get used to a new city, we want to remove the long 'to do list' that contains questions such as “where will you stay”, “what will you eat”, “where will you do sport”, “how will you pay the bills”, “how will you socialize” etc. We want to prepare a full, funny and social package of facilities for you beyond secure and comfortable accommodation. We want to make the most beautiful university moments in your life more memorable and livable. We are at Republika and we work for you with all our energy. For all questions and problems for 24 hours during 7 days...

We wish that we can have happy days together...

SERVICES OF DORMITORY
Room prices of Republika Academic Apartments include electricity, water, heating/cooling, high speed internet, gym, swimming pool, use of kitchenette, playstation/game room, room cleaning for two times per week, shuttle services and 24 hour security. Also, we have packages that include breakfast and dinner.

Republika is more than a student dormitory that provides services such as 24 hour reception, housekeeping, technical service, concierge services, room cleaning for 2 days per week as well as outdoor swimming pool, gym, car park and similar facilities.
In this program intended for MEDICAL STUDENTS AND DOCTORS
To get to know the environment where you will work in the future: Before starting your career, you will get an opportunity of seeing the environment where you will work in the future. This will enable you to observe the working environment while you do internship and you will get a chance of questioning the position that will make you happier. Besides, you will see if the career that you want is actually suitable for you or not and you can make new plans and establish new targets before it is too late. In addition, you can solve the problem of conflict and adaptation that might occur when the difference between your expectations and actual state that is described as 'reality shock' is too big.

- Ensures that you make a stronger beginner in your career when you return to your country,
- A perfect first step for your career abroad,
- Professional references from abroad will be the most prestigious parts in your CV,
- Ensures that you get to know a new culture,
- Ensures that you explore yourself,
- Creates an opportunity to improve your foreign language ability in business environment,
- Those that successfully complete the program are awarded a mid-level business competency certificated approved by the official authority in the relevant country.

You can do short and long term internship in any medical branches that you want in the most popular hospitals in Turkey. After the completion of internship, hospitals grant CERTIFICATE.

If you want to develop your medical experience by doing internship in the most popular hospitals in Turkey, hurry up to contact us…. Do not miss the opportunity of doing internship in all state and private hospitals in Turkey...
